

Ometis Manufacturing Data Services

Data strategy, management, analytics, AI, platforms, and engineering.

WHO WE ARE

We help businesses get more value from their data through great technology, true expertise, and fast ROI.

We've been doing this for 25 years for more than 250 organisations.

We work with Snowflake, Microsoft, Databricks, Jedox, Inphinity, and more. If something else fits your needs better, we'll tell you upfront.

“It’s been a breath of fresh air moving to Ometis. I feel like we're getting more information about new things that allows us to implement it into our environment. This has made such a difference to our users.”

Siobhan Mcmillan, Data Lead at Bell Group UK

WHAT WE DO

Delivery, Adoption & Enablement

Proven Process

Engagement Models

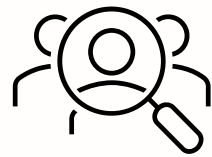

Support

STRATEGY & GOVERNANCE

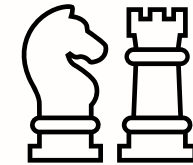

Data Strategy & Advisory

We help you define data strategy, architecture, operating models and roadmaps that deliver results.

DISCOVERY

Identify key data opportunities and challenges through structured assessment and engagement.

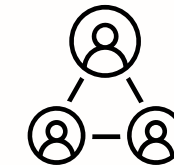

STRATEGY & ARCHITECTURE

Align data strategy and architecture to business objectives, creating a secure, scalable foundation for analytics, AI, and sustained value.

INVESTMENT CASE

Build a clear, evidence-based investment case that quantifies ROI to support investment in data, analytics, and AI.

OPERATING MODEL

Establish the people, processes, and governance required for sustainable data success.

ROADMAP

Create a prioritised plan of initiatives and investments to deliver data maturity and measurable impact.

25 years experience

250+ UK customers

Vendor-agnostic approach

DATA MANAGEMENT & PRODUCTS

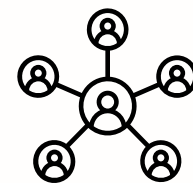

Data Management & Products

We build frameworks that make your data accurate, secure and governed across its lifecycle.

GOVERNANCE & ETHICS

Establish ownership, accountability, and ethical principles for responsible data management.

MDM/METADATA

Implement master data and metadata frameworks that create consistency and transparency.

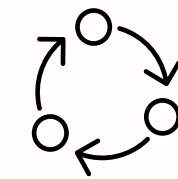

DATA QUALITY

Measure, monitor, and improve accuracy and completeness to strengthen decision-making.

DATA SECURITY

Safeguard sensitive information with governance-aligned access and protection controls.

DATAOPS

Deliver continuous delivery and improvement of data pipelines through automation and collaboration.

25 years experience

250+ UK customers

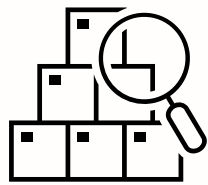

Vendor-agnostic approach

ANALYSIS & INSIGHT

Analysis & Insight

We turn raw data into actionable insight through analytics, visualisation and reporting solutions.

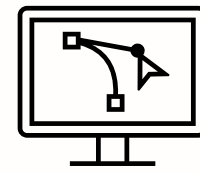

BUSINESS ANALYSIS

Understand business context, define requirements, and KPIs to ensure analytics aligns with strategic goals.

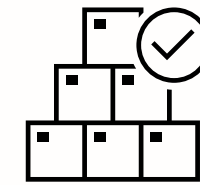

DATA ANALYSIS

Analyse and validate data to uncover patterns and insights that inform decision-making.

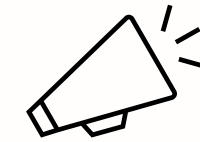

VISUALISATION

Design intuitive, impactful visuals that make data easy to understand and act upon.

BI & ANALYTICS

Deliver scalable BI solutions that enable users to analyse data and drive action.

REPORTING & ALERTING

Evaluate performance and usability of existing analytics solutions.

25 years experience

250+ UK customers

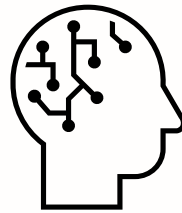

BARC and IDC research partners on AI

AI & ADVANCED ANALYTICS

AI & Advanced Analytics

We help you move from hindsight to foresight through practical AI and data science solutions.

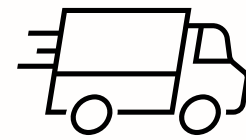

AI/ML READINESS

Assess data, systems, governance, and skills to understand AI readiness and define what is needed for successful AI and ML adoption.

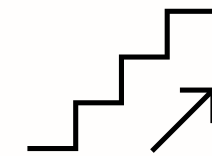

AI OPPORTUNITY ANALYSIS

Identify, evaluate, and prioritise high-value AI use cases based on business impact, feasibility, and potential return on investment.

RAPID AI POC/POV

Deliver fast, low-risk AI proofs of concept and value that demonstrate measurable business impact.

AI SCALING

Transition successful AI pilots into secure, scalable, production-ready solutions that deliver sustained business value.

DATA SCIENCE

Extract insights from your data using advanced statistical modelling, machine learning, and AI techniques.

25 years experience

250+ UK customers

Vendor-agnostic approach

DATA PLATFORMS & SOLUTIONS

Data Platforms & Solutions

We design, implement, migrate and optimise data platforms that deliver performance, scalability and governance.

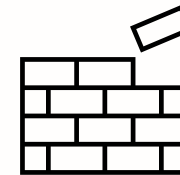

EVALUATION

Assess and compare platform and solution options to select the best fit based on your business needs.

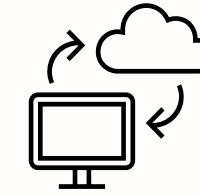

ARCHITECTURE

Define scalable architectures aligned to business needs.

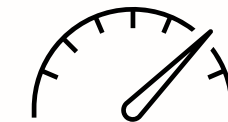

DELIVERY

Implement and configure platforms and solutions using best practices and automation.

MIGRATION

Plan and execute secure migrations of data platforms and analytics solutions to modern cloud or hybrid environments.

AUDIT & OPTIMISATION

Audit data platforms and analytics solutions to improve performance, cost efficiency, security, and governance.

25 years experience

250+ UK customers

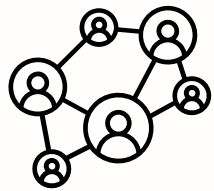

Vendor-agnostic approach

INTEGRATION & ENGINEERING

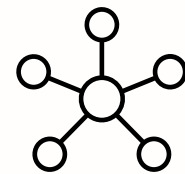

Integration & Engineering

We engineer data foundations that power analytics, AI and data-driven action across your organisation.

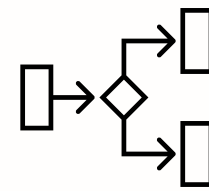

DATA MODELLING

Design data models that optimise performance, enable analytics and AI, and enforce consistent definitions and governance.

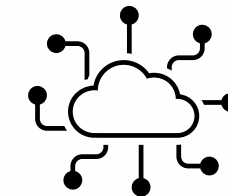

INTEGRATE & INGEST

Automate extraction, cleaning, and transformation for consistency and reliability.

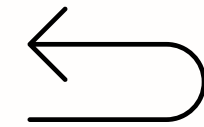

TRANSFORMATION & PIPELINES

Build and manage data transformations and pipelines that standardise, enrich, and prepare data for analytics and AI.

ORCHESTRATE

Orchestrate and monitor complex data workflows, managing dependencies, scheduling, and reliability across tools and pipelines.

REVERSE ETL

Push curated, governed data from your analytics platform back into operational systems to drive action, automation, and data-driven workflows.

25 years experience

Partnering with best in class vendors

40+ migrations completed

HOW WE WORK

OUR PROVEN PROCESS

Best results come from a structured approach.

Our proven process takes you from discovery through to review, balancing strategic planning, practical delivery and continuous improvement at every stage.

[Learn more.](#)

DELIVERY, ADOPTION & ENABLEMENT

Data maturity assessments, delivery management, adoption support, training and data literacy programmes.

[See our training courses.](#)

SUPPORT

Basic, Platform, Application and Extended support levels tailored to your critical systems and needs.

[Learn more.](#)

ENGAGEMENT MODELS

Fixed price projects, time and materials, resource augmentation, bank days and managed service retainers.

[Our work](#)

“Attentive, responsive and always willing to be flexible to find a solution. Also, extremely personable and skilled consultants.”

Dan Williams, Head of Data and BI at PizzaExpress

OUR WORK

More than 250 businesses trust us their data partner including:

KOMATSU

INEOS

IR *Ingersoll Rand*

DENSO

**Oscar
Mayer**

 **VITA GROUP**

 **HADLEY
GROUP**

HÖRMANN

WHY COMPANIES CHOOSE US

1

We're tech agnostic

We'll work with you to understand the business problem first, then find the right solution based on your existing set up and goals.

2

250+ businesses trust us

Including 50+ hospitality operators, 25+ universities, financial providers, manufacturers, legal firms, and more.

3

We focus on long-term partnerships

Customers stay with us for 5+ years and our NPS score is 83 because we care about outcomes, not just deliverables. Your success is our success.

Proven process

"One of the most knowledgeable and friendly consultancies I've had the pleasure to work with over 35 years in the ERP and BI arena.

These guys aren't 'normal' in a good way - i.e. they don't live and breathe by SLAs or ticking boxes. Instead, they offer a tailored service centred around what we need, not what they have to sell.

As a consequence, we've stayed with Ometis for over 10 years."

John Griggs, Business Systems Manager at Branston

OMETIS PROVEN PROCESS

Our Proven Process balances strategic planning, practical delivery and continuous improvement.

It's based on 25 years delivering data solutions for 250+ UK customers and tailored to your needs.

1

Understand "Define the journey"

Engagement

Mobilisation

Discovery

Before any delivery begins, we listen to your goals and challenges, understand how your data, systems, and teams work, and align everyone on what success looks like.

This ensures we're solving the right problem.

2

Deliver "Govern the work"

Design

Implement

Adopt

We design and build solutions that fit your needs and constraints, keeping delivery controlled and transparent throughout.

Training and adoption support are built in so your teams understand and use what's being delivered.

3

Assure "Realise the value"

Operate

Review

Conclude

We review what's been built against your original goals and make sure the solution is stable, secure and understood.

Whether you continue independently or with our ongoing support, you're in a strong position to maintain and improve it.
